

Muhammad Qasim Akram

Full Stack Developer | React & Node.js

Bahawalpur, Pakistan | +92 312 6442266 | qasimakram46@hotmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Full Stack Developer and CS student with 3 deployed production applications on Azure, Vercel, and Railway. Built DevChat, a full-stack AI chat application with MongoDB Atlas, JWT auth, and Groq LLaMA 3.3-70B, and yourOwn, a fully deployed e-commerce platform with React, Node.js, and Azure App Service CI/CD. Solid foundation in React.js, Node.js, REST APIs, MongoDB, and AI integration.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Vite, React Router v6, Context API, useReducer, CSS Modules

Backend: Node.js, Express.js, REST APIs, JWT Auth, bcrypt, Sequelize ORM

Database: MongoDB Atlas, MySQL, SQLite

Cloud & DevOps: Microsoft Azure App Service, Vercel, Railway, GitHub Actions (CI/CD), Netlify

Other: Git, GitHub, Python, NumPy, Pandas, Machine Learning, C++

PROJECTS

ChatRoom – Real-Time Chat Application

Islamia University of Bahawalpur | 2026

Links: [Live Demo](#) | [GitHub](#) Tech: Django 4.2, DRF, Django Channels, PostgreSQL, Redis, SimpleJWT, React.js, Vercel, Railway

- Built a full-stack real-time chat application with Django Channels and WebSockets, enabling instant messaging, emoji reactions, and live notifications across chat rooms with PostgreSQL persistence.
- Implemented JWT authentication with SimpleJWT and custom WebSocket middleware that validates tokens passed as query params, supporting 60-minute access and 7-day refresh tokens.
- Designed a REST API with Django REST Framework covering rooms, messages, reactions, and notifications, with Redis pub/sub broadcasting real-time events via Django Channels; deployed across Vercel (frontend) and Railway (backend, PostgreSQL, Redis).

DevChat – AI Developer Assistant

Personal Project | 2026

Links: [Live Demo](#) | [GitHub](#) Tech: React 19, Node.js, Express.js, MongoDB Atlas, JWT, bcrypt, Groq LLaMA 3.3-70B, Vercel, Railway

- Deployed a 3-service cloud architecture (Vercel, Railway, MongoDB Atlas) with per-user chat session persistence, auto-generated session titles, and markdown rendering with syntax-highlighted code blocks.
- Integrated Groq's LLaMA 3.3-70B via server-side API proxying so the API key never leaves the backend; built quick-action chips (Debug, Explain, Optimize) and a collapsible sidebar with full session history.
- Managed state with Context API and useReducer, custom hooks (useAutoScroll, useFormInput, useLocalStorage), error boundaries, and full JWT and bcrypt auth with protected routes.

yourOwn – Full Stack E-Commerce Platform

Islamia University of Bahawalpur | 2026

Links: [Live Demo](#) | [GitHub](#) Tech: React 19, Node.js, Express.js, Sequelize, SQLite, JWT, bcryptjs, Azure, GitHub Actions

- Deployed a production e-commerce platform on Microsoft Azure App Service with cart management, order tracking, and delivery options — 14-endpoint REST API covering products, cart, orders, and payment summary.
- Set up an end-to-end CI/CD pipeline with GitHub Actions so that any push to main deploys to Azure in under 2 minutes with no manual steps.
- Implemented JWT authentication with bcryptjs password hashing, protected routes, and 7-day token expiry across signup, login, and session management flows.

EDUCATION

Islamia University of Bahawalpur

Sep 2023 – Sep 2027

BS Computer Science | 6th of 8 Semesters

Relevant Coursework: Web Engineering, DSA, DBMS, OOP, Theory of Automata, Parallel Computing, Compiler Construction, Computer Vision

CERTIFICATIONS

Advanced MySQL Topics — Meta | Sep 2025 | [Verify](#)

Supervised Machine Learning: Regression & Classification — Stanford University / DeepLearning.AI | Dec 2025 | [Verify](#)

Python for Data Science, AI & Development — IBM | Oct 2025 | [Verify](#)

AI For Everyone — DeepLearning.AI | Jul 2025 | [Verify](#)
